

Adding a background image to the Client Hub

When configuring the Client Hub, you have the option to get in contact with the support team and personalise it by requesting your own image to be uploaded as the background.

To make the background the best quality it can be, there are a few things you will need to take into consideration.

The ideal screen size for the Client Hub is 3000 x 1200 pixels. We will have to resize images to fit the page, this may take away from the quality of the image so ensure it is of high quality originally.

We ask that you send us a few options of images we can use, this is because we find the image that best fits across all devices (PC, mobile phones, and tablets).

Please send the images over to support@morsolutions.co.uk
